Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 7/17/03 has been entered and the SINGH declaration filed 7/17/03 has been fully considered.

All objections and rejections not reiterated below are hereby withdrawn.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) do not apply to the examination of this application as the application being examined was not (1) filed on or after November 29, 2000, or (2) voluntarily published under 35 U.S.C. 122(b). Therefore, this application is examined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

Claims 39 and 42-43 are rejected under 35 U.S.C. 102(b) as being anticipated by STALEY (Comp. Usage Mater. Educ. Proc. Symp. (1985), pp. 113-122, abstract only).

Claims 39 and 42-43 are rejected under 35 U.S.C. 102(e) as being anticipated by OSSLUND (US 5581476, filed 1/28/1993).

As applicant combined arguments with regard to both SATLEY and OSSLUND, the arguments will be considered for both rejections in the same manner. Applicant's arguments filed 7/17/03 have been fully considered but they are not persuasive.

In response to the argument that the program now recited in the amended claims causes a functional relationship to exist between the computer and three-dimensional coordinates, applicant is reminded that the claims are directed to products, not methods. As previously set forth with regard to the computer, a program "with instructions for producing" a 3D representation of a molecule, is one which may produce a 3D representation of ANY molecule. The program limits the computer in which it resides to be one capable of producing a 3D representation of a compound or molecule, but there is no limitation requiring that the program actually produce any such representation. The structure coordinates are merely data, which may be acted upon by any computer program capable of producing a 3D representation. The coordinates are not changed or transformed by the program; i.e. the program is merely a means of displaying the data; albeit in a different format. Although the computer and program comprised thereon are limited to comprise a (potential) capability for displaying the data in a particular format, this is not a limitation for actual display of data in that format. For these reasons, the examiner maintains that the structural coordinates are nonfunctional descriptive material and do not distinguish the invention in terms of patentability.

Applicant is again directed to *in re Gulack* (CAFC) 217 USPQ at 404 and the Trilateral Project WM4, which can be found at http://www.uspto.gov/web/tws/wm4/wm4_index.htm. See

Art Unit: 1631

especially the comments for Case 2. For the reasons set forth above, and previously set forth, the rejections are maintained.

Conclusion

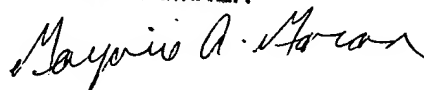

No claims are allowed.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Marjorie A. Moran whose telephone number is (703) 305-2363. The examiner can normally be reached on Monday to Friday, 7:30 am to 4 pm EST.
